

Household Cleaners

Natural, chemical free cleaning that doesn't cost the earth.

Microbz cleaners biologically dissolve dirt and grease particles and are effective against mould and smells. Particularly suitable for allergy sufferers, this deep pore cleaning range is totally natural and chemical free.

Customers report a variety of benefits:

- ⦿ highly effective against odours, mould and tough dirt
- ⦿ kind to skin
- ⦿ non toxic and allergen free
- ⦿ eco friendly and biodegradable - feels good
- ⦿ safe to use around children and animals - that feels good too
- ⦿ doesn't damage surfaces

How it works

Microbz cleaners are combinations of only beneficial microbes, enzymes and essential oils. Microbial cleaners build up a bio-film of beneficial bacteria in the home, so that even after an initial clean the bacteria continue to protect surfaces and fabrics and break down pathogens. The more often a surface is cleaned the harder it is for pathogens to thrive or for dirt to settle.

Did you know...

According to the Upper Austria University of Applied Sciences, **Microbz** cleaners have the same cleaning performances as conventional chemical cleaners.

The cleaning performance lasts longer than a disinfectant. After 48 hours, the test areas that were cleaned with microbes showed fewer germs than comparison areas, which were cleaned with a disinfectant.

A new way to clean

Observe soaking times and dosages - probiotic cleaners work best if left on surfaces for a few minutes, so the microbes can break down the grease and dirt.

Floor Cleaner (concentrated)	Mix 10ml in bucket with 5-10 litres of warm water	Mop - that's it!	Leave to dry, no need to rinse	Store in a cool dark cupboard
Multi surface cleaner (concentrated)	Pour 5-10ml into 500ml spray bottle and fill with water	Spray surfaces. Also good for cleaning glass	Wait 5 mins and wipe	Store in a cool dark cupboard
Power cleaner (concentrated)	Pour 5-10ml into 500ml spray bottle and fill with water	Spray sinks, hobs and greasy surfaces	Wait 5 mins and wipe	Store in a cool dark cupboard
Textile cleaner (concentrated)	Pour 5-10ml into 500ml spray bottle and fill with water	Spray curtains, carpets and fabrics	Wait 30mins for heavy fabrics, then vaccum. Wait 10 mins for lighter fabrics then wash	Store in a cool dark cupboard
Air and Fabric Freshener	Already diluted	Spray into the air or onto fabrics	No need to withdraw children or animals	Store out of direct sunlight
Ceramic Water Pipes	Drop into water, bottles, kettles and cisterns			Unlimited shelf life
