Dear Professor Robin May

I am writing to you as a buyer of probiotics for animals. My probiotic has had to be withdrawn as a result of a limited number of strains of live active cultures being unauthorised for animal feed. I have personally seen a number of health benefits after using these products.

I am writing to ask you to look again at the regulations surrounding the strains of bio live cultures for animals.

Please look again at the research. I hope that you are able to adjust your regulation accordingly.

Kind Regards
